PROFESSIONAL SUMMARY

I'm a technical support analyst with three years troubleshooting SaaS platform issues for Australian customers. I triage tickets, reproduce bugs, write clear reproduction steps for engineering, and communicate technical concepts simply to end users. I hold a COMPTIA A+ certification and I'm comfortable working in Zendesk, Confluence, and basic SQL for database lookups. I'm known for thorough investigation — I don't close a ticket until the root cause is confirmed.
