PROFESSIONAL SUMMARY

I'm a frontend developer with four years building React applications for Australian startups and agencies. I write clean TypeScript, implement pixel-perfect designs from Figma, and take performance seriously. I've built SPAs, Next.js apps, and design system component libraries. I'm comfortable with REST and GraphQL APIs, and I write unit tests in Jest and Vitest. I work well in remote Agile teams and I'm confident presenting my work in sprint reviews.

SKILLS
